## think RemodelWest<sup>sm</sup>

### construction process

No matter how small or large your project hiring a qualified contractor to build your project is imperative. Within **RemodelWest** we have established two separate companies enabling us to fulfill all your remodeling needs. At **RemodelWest Construction Inc.** we employ a long standing staff of project managers, carpenters and trade partners whom have the capability to manage and build projects of all calibers. We have established Sustainable Design as a core company value representing the foundation of a responsible project. We are pleased to propose healthy solutions for your family, our staff and our earth.

A complimentary consultation in your home is the first step. We will review your design and plans, explain our services, and demonstrate our capabilities. If you do not have a completed design we can have our affiliated design company **RemodelWest Design Inc.** meet with you to discuss your project. Next we will provide a proposal to build your project based on your specifications.

› We are pleased  
to propose healthy  
solutions for you, our  
staff and our earth. ‹

community | energy | indoor environment | resource conservation

## summary of construction services.

### consultation

Whether working with your architect or our companion design company it is ideal to study cost early in the design process. Our staff can help.

**Feasibility** – A visit to your site to discuss possibilities within your property or to review proposed design solutions.

**Preliminary cost studies** – Collaboration with you and your design professional to review your early design plans and provide our opinion of probable cost. This helps in directing design therefore keeping the process on track.

### estimating and proposal

Comprehensive design and construction experience are the foundation of a dependable estimate. We can help with whatever areas you may need.

- › Project estimating and proposal per final plan set, engineering and specifications.
- › Utilization of our estimating system broken down into standard categories.
- › Analysis of options within the project.
- › Assistance in product, material specifications and interior design as desired.
- › Sensitivity to investment goals and creative offerings to achieve.

### construction

After many months of planning the time has come to make it a reality. Our team of resources goes to work for you.

- › Material procurement and construction scheduling using Microsoft Project.
- › Pre-Construction meetings with you and your design professionals to position us for successes.
- › Construction of your project using our in house personnel, trade partners, and authorized suppliers.
- › Implementation of sustainable practices for the health of your home.
- › Clean, safe and environmentally sound jobsite conduct.
- › Quality Control and Project Management.
- › Frequent communication by site meetings, email, and web based solutions.
- › Proactive interaction with your design professionals, cities, and owners.
